Cloud Service Description (200 words or less)

LAMS, the Learning Activity Management System, is a free and open-source learning design system for designing, managing and delivering online collaborative learning activities. It provides teachers with a visual authoring environment for creating sequences of learning activities. These activities can include a range of individual tasks, small group work and whole class activities based on both content and collaboration.

LAMS support a variety of learning and teaching strategies, some which include: Team based learning, Problem based learning, Case based learning, etc.
